

SAP Archiving Concept

- ➔ Are you concerned about the increasing volume of your database which is slowing access to your data?
- ➔ Is the database administration getting more and more difficult?
- ➔ Do you need immediate and easy access to SAP print lists?
- ➔ Is reliable reprint of outgoing documents (created using SAPscript or SAP Smart Forms) important to you?
- ➔ Are you interested in made-to-measure archiving solutions for your company?

CONPEX ArchiveConcept offers you the optimal archiving strategy

A powerful and field-proven CONPEX analysis tool identifies archivable SAP data and provides valuable information for the **CONPEX ArchiveConcept** document. Our long-term archiving practice and knowledge of application modules ensures that **CONPEX ArchiveConcept** will enable your company to archive data, print lists and outgoing documents in the most efficient way.

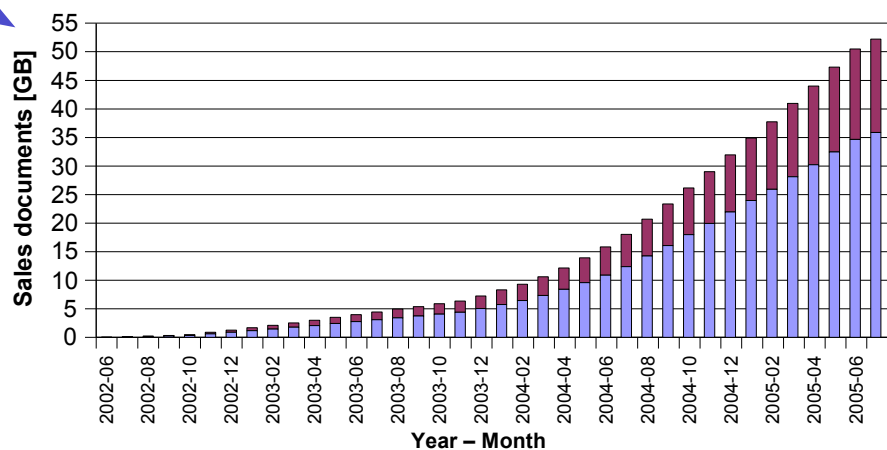

It is only a matter of time when the rate of the data growth in a production system will force you to deal with archiving of aging or obsolete data. SAP system performance is strongly influenced by the size of the database.

For example, the figure on the left shows the total volume of archivable data.

*Note: The volumes of **database indexes** and **database tables** are shown together in the same chart.*

Unique information about time data distribution makes it easier to understand when and how much to archive.

The figure on the right shows the cumulative growth of sales figures in time. Similar figures are available for other archiving objects.

CONPEX ArchiveConcept also identifies types of documents and report outputs suitable for archiving, e.g. outgoing documents (stored as PDF files) or print lists (see **CONPEX PrintList** solution). These document archiving solutions are useful SAP data archiving add-ons.

Key benefits of the CONPEX ArchiveConcept

CONPEX ArchiveConcept answers your questions about what can be archived, when, and in what priority. Even if some archiving is already in place, **CONPEX ArchiveConcept** gives you an overview of other archiving options. **CONPEX ArchiveConcept** makes the archiving project cost effective, time-saving, and ensures fast return on investments.
